1. Overview of "Gérer mes biens immobiliers": features and rollout schedule

A new online service, "Gérer mes biens immobiliers", has been available since August 2021. Now, any property owner, whether an individual or a professional (legal entity), that has a secure account on impots.gouv.fr can access a nationwide list of all their built properties together with their characteristics (surface area, number of rooms, lot number, etc.).

Eventually, this service will enable users to comply with their property-related reporting obligations online, to submit property declarations electronically, to settle urban planning taxes and to declare the occupants of residential premises. The service will also make it possible to collect rents for rented residential premises from landlords as part of the revision of rental values.

Rollout schedule:

- **August 2021:** opening of the service offering all owners a view of all their built properties located in France together with their characteristics
- **Autumn 2022:** opening of the online property declaration service, including settlement of urban planning taxes
- **Early January 2023:** opening of the online declaration service for occupancy status and rents

The autumn 2022 and January 2023 components will be the subject of a specific announcement and will lead to the present guide being updated.
